Moltos

Proactive Mental Wellness AI

Turn life's noise into your inner voice.

NiCoreFlow Co., Ltd. | moltos.net | Qualcomm Innovate in Taiwan Challenge 2026

Information Overload Is Destroying Mental Health

Global Crisis

- **76%** of workers report daily stress from info overload
- **43%** experience burnout from communication overload
- **117** emails/day + endless messaging
- Costs US economy **$1 trillion/year**

Taiwan Is Ground Zero

- **#1 globally** in workplace burnout — 36%
- **1.17 billion** sleeping pills/year — #1 in Asia
- Usage grew **22% in 3 years**

Message overload → **Anxiety builds** → Stress internalized → **Insomnia & burnout** → Productivity drops → More messages → **Repeat**

Why Existing Solutions Fail

Everyone waits for you to ask for help.

SOLUTION	APPROACH	THE GAP
Woebot / Wysa	Wait for user to self-report via chatbot	Doesn't see real behavioral data
Headspace Ebb	Voice companion inside meditation app	Doesn't integrate with work tools
Replika / Pi	Emotional companion chatbot	Doesn't know your real stress level
ChatGPT	General AI assistant	Doesn't proactively monitor you

Common blind spot: None of them see your actual communication patterns.
Woebot shut down its consumer app (June 2025) — proving passive chatbot models can't sustain B2C.

Moltos: The First AI That Sees Your Stress

🔍

Detect

Passively monitor behavioral patterns across LINE, Telegram, WhatsApp, Gmail, Slack

📊

Analyze

Compute a real-time Calm Index (0–100) based on your personal 14-day baseline

📞

Act

Proactively initiate a voice call with real-time emotion analysis

Not a chatbot waiting for you to self-report.

An AI guardian that sees your struggle before you say a word.

From Data to Care in 3 Steps

1

Connect

Link your messaging platforms. Only **metadata** is extracted — message counts, timestamps, reply intervals.

Never message content.

2

Monitor

Calm Index algorithm builds your **personal baseline** using EWMA over 14 days, then detects anomalies via Z-score across 5 dimensions.

3

Intervene

When Calm Index drops → Moltos initiates a **voice call** with dual-channel emotion analysis: what you say + how you say it.

Product Demo: Getting Started

Simple onboarding, powerful dashboard — ready in under 60 seconds

Onboarding

- **Proactive Care** — AI initiates check-ins, you never have to ask
- **Message Integration** — Connect LINE, Gmail, Slack in one tap
- **Privacy Guardian** — All data stays on your device

Dashboard

- **Calm Index Gauge** — Real-time score (0–100) at a glance
- **Message Stats** — 47 LINE, 23 Gmail, 18 Slack messages tracked
- **Voice Call Invite** — One-tap AI voice conversation

Product Demo: AI Conversation & Weekly Insights

Context–aware dialogue + actionable trend analysis

AI Conversation

- **Proactive Outreach** — Moltos starts the conversation when your Calm Index drops
- **Message Prioritization** — Identifies which messages need attention first
- **Emotion–Aware** — Adjusts tone and suggestions based on your state
- **Actionable Advice** — Not just listening, but helping you take next steps

Weekly Insights

- **Calm Index Trend** — 7–day chart showing your stress pattern
- **Weekly Summary** — 312 messages processed, 1.8% above baseline
- **AI Observations** — "Lowest point was Wednesday; consider reducing workload"
- **Emotion Diary** — Track mood shifts over time

Product Demo: Full Control & Privacy

You decide what Moltos can access and how it cares for you

Channel Integration

Connect LINE, Gmail, Slack, Telegram — toggle each on/off anytime. Only metadata (counts & timestamps) is extracted, never message content.

Care Preferences

Set check-in frequency (3×/day), Calm Index alert threshold (below 40), and enable/disable proactive voice calls.

Privacy & Security

All conversation logs stored **only on your device**. End-to-end encryption protects your privacy. No data sold, ever.

The Calm Index Algorithm

Open-Source, Transparent, Verifiable

DIMENSION	SIGNAL	ANOMALY THRESHOLD
Message Volume	Daily count vs. baseline	>1.5σ deviation
Reply Latency	Response time trend	Consistently slower
Night Activity	23:00–05:00 usage	Abnormal increase
Unread Pileup	Unread count trend	Rising without clearing
Voice Emotion	Speech rate, pitch, pauses	Anxiety markers detected

Pipeline: EWMA baseline → Z-score detection → Sigmoid scoring → Cross-penalty

Privacy First, Edge Ready

DEVICE LAYER — ON-DEVICE AI

Calm Index Engine
Local computation

Voice Emotion Analyzer
Acoustic features

Metadata Extractor
Counts & timestamps only

↓ encrypted metadata only ↓

CLOUD LAYER — MINIMAL, ENCRYPTED

AI Chat Engine
Multi-model routing

Smart Router
80% light / 20% premium

Proactive Scheduler
Dynamic intervention

✓ Calm Index on-device → zero cloud cost

✓ Only metadata leaves device

✓ E2E encryption for voice

Qualcomm Integration Opportunity

Why on-device AI is essential for mental health

	CLOUD APPROACH	ON-DEVICE (QUALCOMM AI ENGINE)
Privacy	Data leaves device	Data stays on device
Latency	Network dependent	Instant inference
Cost	$0.24/user/month	Near $0/user/month
Availability	Requires internet	Always-on monitoring

Phase 1
Calm Index → AI Engine / Hexagon DSP

Phase 2
Voice emotion → Neural Processing SDK

Phase 3
Always-on → Sensing Hub (ultra-low power)

$91B Market Growing at 23% CAGR

2025

$17.1B

2033 (Projected)

$91.2B

CAGR 23.29%

Source: Grand View Research

Target Segments

SEGMENT	TAM	STRATEGY
B2C	30M+ knowledge workers APAC	Freemium via LINE/Telegram
B2B	2,000+ enterprises	Per-employee licensing
B2B2C	Insurance & healthcare	Partnership integration

Go-to-market:

Taiwan (LINE) → Japan / SEA → Global (WhatsApp / Slack)

No One Does All Four

CAPABILITY	MOLTOS	WOEBOT	WYSA	HEADSPACE EBB	REPLIKA
Real communication data	✔	✘	✘	✘	✘
Passive stress detection	✔	✘	✘	✘	✘
Proactive voice call	✔	✘	✘	Partial	Partial
On-device / privacy-first	✔	✘	✘	✘	✘
Open-source algorithm	✔	✘	✘	✘	✘

Moltos occupies a **unique intersection** that no competitor addresses.

96% Gross Margin at Scale

AI Cost / User / Month	Pro Subscription	Gross Margin	vs. ChatGPT Plus
$0.24	$7.99 / month	96%	83x cheaper

B2C
Free + Pro subscriptions

B2B
Per-employee enterprise licensing

B2B2C
Insurance & healthcare partnerships

Traction & Milestones

MILESTONE	STATUS
Community validation (30–person survey)	✔ Done
Calm Index algorithm — core development	✔ Done
Open–source release (MIT License)	✔ Done
Product website (moltos.net)	✔ Done
2026 Best AI Awards submission	✔ Done
Telegram Bot MVP	In Progress
LINE integration	Planned Q2 2026
Beta launch (100 users)	Planned Q3 2026

Team

Y

Chi-Chang Yu (余啟彰)

Founder & CEO

- 5+ years full-stack independent development
- Shipped ERP systems, payment integrations, LINE Bot platforms
- Multiple WordPress plugins serving real businesses
- Lean execution: one person + AI-augmented development

Seeking from QITC

- Edge AI deployment strategy
- Enterprise market entry guidance
- Fundraising mentorship

The Ask & Vision

What We Need from QITC

Mentorship
Edge AI deployment + GTM strategy

Tech Access
AI Engine SDK, Sensing Hub docs

Network
Enterprise wellness & healthcare partners

Grant
US$10,000 to accelerate MVP → beta

12-Month Roadmap

Q2 2026
MVP complete + LINE integration

Q3 2026
Beta (100 users) + on-device Calm Index PoC

Q4 2026
Public launch + first enterprise pilot

Q1 2027
Japan/SEA expansion + Seed fundraising

> *"We don't replace therapists.*
> *We catch people before they need one."*
